FINANCIAL AND COMMERCIAL. THURSDAY, June 21. The action of the market to-day proved pretty clearly that there has been a bear clique at work endeavoring to bring about lower prices and force liquidation. The existence of such a clique has for some time heen auspected, but that it has achieved any important measure of success up to this time seems very doubtful. Conditions both at home and abroad have been more favorable to advancing than to declining prices, and encouraged by the advance in the Baltimore and Ohio dividend and the prospect for increased disbursoments on other important issues the London markets were strong, sided, no doubt, by the reduction in the Bank of England rate, and quotations of American stocks in nearly all instances showed advances from the level of Wednesday night's New York closing. The opening here did not come up to the London level in some of the active issues, notably Baltimore and Ohio, which from the start was affected by realizing sales for the account of speculative interests which had bought several points lower down in the belief that even if no increase were made in the dividend rate the stock was not particularly dear at the level of prices then ruling. Business had not been in progress more than a few minutes when United States Steel yielded to pressure, and the decline in this stock had the effect of unsettling the whole market. The selling was ostensibly based on the shading of prices for foundry iron by Southern concerns and on the revival of rumors that the corporation itself would soon authorize an issue of \$50,000,000 bonds for construction purposes. The latter rumor has become quite familiar to the Street, but the belief in good quarters is that for the present the company will continue to carry on its betterment work by the application of surplus earnings for that purpose, and that the raising of new money through the issue of securities in any form is not imminent. The reduction in the Bank of England rate had the effect of causing further weakness in the foreign exchange market and giving rise to discussion of the possibility of gold imports, but banking interests did not expect that imports of the yellow metal could be arranged in the near future. The decision of the Appellate Division of the Supreme

Court holding that the 80 cent gas law

must stand until declared unconstitutional,

and that the Consolidated Gas Company

cannot cut off the supply from consumers

rate, had a depressing effect on Gas stock

and was in a minor way an influence in

bringing about the decline in the general

list. The reports that St. Paul might not

grant rights to its stockholders after all,

preferring if possible to negotiate a loan

n Paris, were doubted in good quarters

The fact that an agreement was reached

between the owners of Fall River cotton

mills and their employees on the wage

question was regarded as a matter of con-

siderable importance, particularly in its

who refuse to pay more than the 80 cent

relation to the continuance of prosperity in New England and in the cotton raising For a great many years Wall Street has regarded the iron and steel industry as the barometer of general trade conditions and has watched its changes very closely on the ground that it was much eassier to study the one branch which was a true index of the general situation than to take a broad view of the whole field. It is perhaps unfortunate that this is so. If there were no such thing possible in the pig iron trade as manipulation, then there might be some justification for the significance with which the Street regards a slight shading in pig iron prices. But not only can the pig iron market be manipulated, but it is an established fact that it has been manipulated on various occasions in the past, and there is no reason to believe that it will entirely escape such treatment in the future. However, leaving out altogether the subject of manipulation, the makers of pig iron, failing to read accurately the true conditions in the trade. may at times sell at concessions some part of their supplies for which they could perhaps obtain a higher price had they but held off for a short period, or in their eagerness to show big earnings they may produce in one month more iron than is demanded by the existing conditions of the trade and thus temporarily disarrange the market. At present some of the principal iron concerns in the South are controlled by Wall Street interests, which may have sought to take advantage of the popular belief that the sale of a few thousand tons of foundry iron at a slight concession from the nominal price meant a weakening in the trade which would soon manifest itself all along the line. The importance of the matter has, however, been grossly exaggerated, and if anything more was wanted to show that bearish operation rather than the selling of long stock caused the decline in the United States Steel issues it was furnished in the circular issued by a Boston operator in which he strongly advised short selling of Steel preferred, intimating that the tariff question would play an important part in the election next November. The decline in United States Steel made a new low record for the year in the stock, but there was nothing to indicate that investors in the security felt at all disturbed, and at the low level buying of very good character appeared to be met with. Accumulation of Southern Pacific seemed to be in progress, although the day's news brought forth nothing to account for this buying, and the belief gained ground that the explanation was found in the possibility that some portion of the preferred stock remaining unissued in the treasury would before long be sold to present common stock holders at par. Directors of Louisville and Nash-

RAILROAD AND OTHER BONDS.

ville declared the regular semi-annual

dividend of 3 per cent., justifying the best

informed anticipations that the question

of an increase would be deferred until next

winter after the crops have been secured

and the outlook for the year's business

made reasonably clear.

Boston, June 21.—After a steady opening the market here to-day gradually sold off during the remainder of the session, the closing prices being at or near the low point of the day. Business was light, but there was considerable pressure in Amalgamated and Copper Range. Massachusetts Gas declined 34 points on the announcement of the dividend, placing the common stock on a 3 per cent basis.

In the early trading in the outside market to-day prices were steady and there was a display of firmness in some of the Copper shares, notably United Copper, Boston Consolidated and Greene Consolidated. At midday, however, the market became more active and the whole list weakened. Fractional declines were general at the close and included 1½ points in United, 2 in Boston Consolidated and ¾ in Nevada Consolidated. American Tobacco advanced 5 points and Otis Elevator 1. The Cripple Creek Railway issues were also strong. Mackay Companies, Butte Coalition and International Mercantile Marine stocks were steady. American Can stocks were lower, the preferred losing ¾. The market closed weak.

THE GRAIN MARKETS.

Prices fregnise-Anst Reported in Sit -Bearish Advices From the Northwest.

"Bearth Advises From the Northwest.

Whest advanced at one time, partly on reports of past in filmots and a could hackward season at the Northwest. Liverpool closed to high higher. Parts was ign lower to ign. higher. Budapust advanced ign.

Early in the day whest declined, owing to reports of favorable weather conditions over much of the West and the fact that they seemed to be no confirmation of the reports of demage in Argentina. Plarvesting conditions were in general pronounced favorable forms favorable reports even in circulation concerning yields in doublern Illinois, southconcerning yields in southern Illinois, south orn Missourt and Totas. In Totas the cro-A Co. state that erop prospects on the Continent of Europe are better than those of last rear. Burnania, an average crop. Russian harvest outlook favorable. Love & Co. had a despatch from Argentina saying. Damage very trifling. Barely worth mentioning Graip area too small. Seeding now in full

Broomhall reported the Liverpool market firm on the American news. A better under-tone, and scant offerings of Argentine, easing hater on pressure of larger arrivate. He made no mention of any damage to the Argen-

tine crop The Price Current says that harvest is be ginning with good indications as to and yield. Favorable reports were again received in regard to crop in the American and Canadian Northwest. The Winniper and Canadian Northwest. The Winnipeg Commercial estimates crop possibilities of Manitoba and the Territories this year at 17,000,000 bush, against its estimate of \$5,000,000 last year and the official returns of \$6,000,000. The Northwestern Miller said that altogether the outlook for wheat in the Northwest up to date is very promising. A Manitoba despatch said that the condition of the growing wheat was also most satisfactory. The outside markets were heavy, especially St. Louis.

growing wheat was also most setifactory. The outside markets were heavy, especially St. Louis.

But later on shorts became nervous, partly because of reports of damage from rust in Illinois. Some unfavorable crop reports, too, came from the Southwest. Kansas City reported disappointing thrashing returns, with Texas, Oklahoma and Indian Territory running about 12 to 13 bush. to the acreage, instead of 22 to 25 as expected. A Chicago despatch to T. A. McIntyre & Co. said. "Reports of rust in Nebraska. Oklahoma says crob won't average more than 15 bush. to acre, against estimates of 25 bush. Manitoba wires estimates of that crop been too large. Shorts covered freely and many commission houses show a disposition to buy on all setbacks."

The stock at Minneapolis has decreased 225,000 bush. in five days. The crop movement was smaller. The total primary arrivals were 211,000 bush., against 257,000 last week and 251,000 last year. With shipments of 206,000 bush., against 222,000 last week and 182,000 last year. The exports, though by no means heavy, were larger than of late. The seaboard cleared 11,000 bbls. of flour and 44,000 bush. of wheat. The Argentine shipments for the week were estimated at 1,600,000 bush., against 1,606,000 last week and 2,816,000 last year.

The trading, however, was largely of a

against 1,696,000 last week and 2,816,000 last year.

The trading, however, was largely of a scalping nature, and later on when the early buyers wanted to take profits prices slowly receded. It turned out, too, that the Illinois rust scare had been overworked. The rust was discovered in an eighty acre field at Lincoln, a section of the State where little wheat is grown, and that only winter.

Some think the market will soon feel the depressing effects of the new wheat arrivals. July delivery day, moreover, is not far off. At the moment, however, the market responds more readily to bullish features of the news than it does to those of an opposite character.

sponds more readily to bullish the news than it does to those of an opposite character.

St. Louis wired: "Waggoner Grain Company tells me southern Illinois, southwest Missouri and Oklahoma are asking for bids on wheat this morning. Inquiries very numerous." Minneapolis—"Looks as if elevators had changed their hedges from July to September. Alilis are long the July. Don't see where short seller is going to get off in July; mills want July." Chicago—"Wheat market strength is evidently due to expanding trade, the black rust and other items of similar lack of importance being given more credit than they are entitled to. Attention is called to the fact that the black rust report is from a corn county, in which wheat is but a very small part of the area; also to the fact that dry weather, followed by cold rains, has made a condition in which black rust could not exist." St. Louis—"One of our best bulls selling wheat thinks this bulge unnatural on eve of movement. Elevator people selling July on this bulge. The market looks strained; acts like a scalper's beilge."

Messrs. Shearson, Pringle Comstock, Champ-lin and Logan were buyers. Messrs, Wrenn-Ware, Mitchell, Friedman, Wright, Skillen and Peavey were sellers. THE CORN SITUATION.

and Peavey were sellers.

THE CORN SITUATION.

Corn advanced early on lower temperatures, a bullish Cincinnati Price Current report, the firmness of wheat, large shipments from Chicago and small offerings. The Price Current says: "Corn is irregular and cool weather is not propitious, but the crop is making fairly good progress and is clean of weeds. Liverpool advanced ½d. to ½d.

Shorts covered and commission houses bought while there was an absence of selling pressure. A good demand for cash corn was reported at Chicago at stronger quotations.

Later on when wheat receded corn followed. The Argentine shipments were estimated at 2,800,000 bushels, against 2,169,000 last week and 2,137,000 last year, and estimate of the exportable surplus of that country made it 140,000,000 bushels, with the total crop 198,000,000 bushels, with the total crop 198,000,000 bushels, against 143,000,000 last year. Chicago received 485 cars, including 205 of contract grade. The total primary receipts were 634,000 bushels, against 609,000 last year, with shipments of 890,000 against 671,000. The seaboard cleared only 2,000 bushels.

Bartlett. Frazier & Carrington, said: "The

671,000. The seaboard cleared only 2,000 bushels.

Bartlett, Frazier & Carrington, said: "The successful bulls in the coarse grains would need but very little encouragement to again take hold. Under the circumstances we do not look for much of a break in either corn or oats." Messrs, Comstock, Kidston and Logan were buyers. Messrs, Shearson, Cudahy, White and Bartlett were sellers. THE OATS FEATURES.

and Bartlett were sellers.

THE OATS FEATURES.

The weekly report of the Cincinnati Price Current was of a kind to encourage buils. So was the later firmness of wheat and corn.

The Price Current says that advices are confirmatory of the shortage in the crop. Bullish private reports were also in circulation and received credence. Shorts covered and commission houses bought.

Later on prices eased off in company with the rest of the list. The baving was not aggressive and on the whole the trading lacked interesting features. Large country acceptances were reported. The Chicago receptances were reported. The Chicago recepts were 170 cars, including 54 of contract grade. The primary receipts were 494,600 bush. against 496,000 last year, with shipments of \$18,000, against \$55,000 last week and 275,000 last year.

Peavey and the Northern Grain Company were sellers. Messrs. Logan, Armour and Nye were buyers.

Wheat on the spot was dull. No sales, No. 2 red. 4½c. over July, f. o. b., affout for export: No. 1 Northern Duluth, 3c. over; No. 1 northern Manitobs, 91½c. Futures closed ½c. lower to ½c. higher. Sales, 1,500,000 loss. Prices as follows:

MISCELLANEOUS MARKETS.

Coffee Dull, but Firmer -Provisions Lower A small advance took place in coffee early in the day, owing to rather better cables than expected, more or less foreign buying, and covering of shorts, as well as an absence of selling pressure. The trading, however, was on a very light scale and devoid of interesting features, as has been the case for & long time past.

Coffee on the spot was quiet at 754c. for No. 7 Rio. Futures advanced 5 to 10 points, closing steady, with sales of 87,500 bags. Havre was unchanged. Hamburg was unchanged to 4 pfg. lower. Rio was unchanged; ex change, 1-16d, lower at 163, d.; receipts, 3,000 bags; stock, 273,000. Santos declined 50 reis; receipts 13,000 bags; stock, 479,000. Prices here as follows: Highest, Lowest, Closing, Prev. Close

March.........6.75 6.70 6.70 6.75 6.65 6.6.70

Provisions.—Lard was quiet on the spot prime Western, \$0.20; refined Continen, \$9.30; South American, \$0.75. Pork was quiet and steady; mess, new, \$18. Butter—Creamery, firsts, 21c. Eggs—Western, firsts, 17c. Chicago, June 21—"Provisions were weak and lower, the result of the continued liberal hog movement and lessened shipping demand. Longs and packers sold and shorts were credited with most of the buying. Stocks of lard and ribs are increasing rather freely. The prices were as follows:

Open-High-Low-Clos-Pres. | Overline | Overline

SUGAR.—Raw was firm at 3½c. for centrifugal 96 test and 3c. for muscovados 89 test Refined was in good demand and firm: granulated, 4.60c.

Naval Storfs.—Spirits of turpentine, 61c Common to good strained rosin, \$3.95.
